Options: (Check options needed)

- _____ Locking handles
- _____ Drop handles on mesh filters

Quoted Price: _____ Quoted By: _____
Salesperson

- All custom filters must be ordered using their actual dimensions.
- All custom filters include drop handles.
- Actual height dimension - direction of the baffles.

Note: Measurements must be the EXACT size you require. Dimensions shown in the catalog for stock filters are *nominal*, which means the dimensions are approximately 1/2" (13mm) less than listed. For example, a 20" x 20" (508mm x 508mm) filter actually measures 19 1/2" x 19 1/2" (495mm x 495mm). Custom filters, however, are made to the exact size you order [with a + or - 1/8" (3mm) variance].
